Software Installation

The main link to python (with installation instructions) is:

> https://www.python.org.

Please install the latest version of Python 3.
The main link to TensorFlow is:

> www.tensorflow.org.

To install tensorflow in python do:

```
pip3 install --upgrade tensorflow (''--'' are two minus signs)
```

Solutions to common issues

1. Update your pip if needed

```
python -m pip install --upgrade pip  (''--'' are two minus signs)
```

2. Permission denied

You should run the command prompt as administrator.

3. Files not found (windows)

Make sure that you have added python into your system path. Or cd to that folder. Normally python is in C:\Program Files\Python36, and pip is in C:\Program Files\Python36\Scripts.
